01. august 1914
02. NOV 2070
03. dialection
04. the sovereign and a sword
05. psychomedicated
06. plague & punishment

Ghost of the Russian Empire was created in late 2004 in the frigid tundra of central Texas. Its' members are dedicated to bringing voice to the suspicions and astonishments of past, present, and future worlds. Pulling themes from the historical, political, and science fiction realms, the band attempts to transport their ideas with engaging and intricate song work..

*with fiercest demolition* was recorded with producer Erik Wofford (The Black Angels, Voxtro, Explosions in the Sky) at Cacophony Studios in Austin, Texas. The band currently plays shows in and around Austin, and is eager to tour in support of their debut release.

### PRESS

"With Fiercest Demolition" is Texas indie rock at its very finest. Texturally sounds are layered thick with incredulous tone. Ghost of the Russian Empire are a shoegazing indie rock that has the pop elements of Radiohead and My Morning Jacket but the jangled fuzzy guitars of My Bloody Valentine. Brilliantly recorded and delivered, "With Fiercest Demolition" should be on the top of everyone's wish list."  
- Smoother.net April 2006

"Ghost of the Russian Empire...must have OK Computer on repeat, as Brandon Whitten's reverbed vox mimics a more subtle Thom Yorke over a sea of layered textures."  
- Austin Chronicle "99 Bands" 7/8/05

"If you were told to listen to two or three songs by Ghost of the Russian Empire, without knowing who they are, you'd think your friend was showing you previously unreleased Radiohead b-sides...other than that, the music itself is excellent - creative melodies, interesting guitar lines..."  
- Stage and Scene June 2005

Release Date	20 June 2006
Format	EP CD
Catalog Number	TGR003
File Under	Rock
